

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1. (original) A satellite broadcasting system for broadcasting a broadcasting program to be broadcast all at once to many and unspecified apparatus over a wide range through a satellite, comprising:

a transmission apparatus; and

at least one reception apparatus;

A) said transmission apparatus including means for multiplexing an area designation part and a contents part to produce the broadcasting program, and means for transmitting the broadcasting program;

said reception apparatus including a radio wave reception section for receiving a broadcasting program, a current position acquisition section for detecting a current position of said reception apparatus, an area to physical district coordination table including pairs of information, each of which represents an area name and a physical district of the area name, a current area detection section for searching for an area name which includes the current position detected by said current position acquisition section from within said area to physical district coordination table and outputting the searched out area name, a broadcasting propriety discrimination section for comparing the area name outputted from said current area detection section and the area designation part of the broadcasting program received from said radio wave

AMENDMENT UNDER 37 C.F.R. § 1.111
USSN: 09/695,141

reception section with each other and outputting the contents part of the broadcasting program when the area name is included in the area designation part, and a reproduction section for receiving and reproducing the contents part of the broadcasting program outputted from said broadcasting propriety discrimination section.

3, 2 (original) A satellite broadcasting system for broadcasting a broadcasting program to be broadcast all at once to many and unspecified apparatus over a wide range through a satellite, comprising:

AJ
a transmission apparatus; and

at least one reception apparatus;

multiplexing an area designation part and a contents part to produce the broadcasting program, and means for transmitting the broadcasting program;

said reception apparatus including a radio wave reception section for receiving a broadcasting program, a current position acquisition section for detecting a current position of said reception apparatus, an area to physical district coordination table including pairs of information each of which represents an area name and a physical district of the area name, a current area detection section for searching for an area name which includes the current position detected by said current position acquisition section from within said area to physical district coordination table and outputting the searched out area name, a broadcasting propriety discrimination section for comparing the area name outputted from said current area detection section and the area designation part of the broadcasting program received from said radio wave

AMENDMENT UNDER 37 C.F.R. § 1.111
USSN: 09/695,141

reception section with each other and refraining said broadcasting propriety discrimination section itself from outputting the contents part of the broadcasting program when the area name is included in the area designation part, and a reproduction section for receiving and reproducing the contents part of the broadcasting program outputted from said broadcasting propriety discrimination section.

5,
3.

(original) A satellite broadcasting reception apparatus, comprising:

A) a radio wave reception section for receiving a broadcasting program in which an area designation part and a contents part are multiplexed;

a current position acquisition section for detecting a current position of said reception apparatus;

an area to physical district coordination table including pairs of information each of which represents an area name and a physical district of the area name;

a current area detection section for searching for an area name which includes the current position detected by said current position acquisition section from within said area to physical district coordination table and outputting the searched out area name;

a broadcasting propriety discrimination section for comparing the area name outputted from said current area detection section and the area designation part of the broadcasting program received from said radio wave reception section with each other and outputting the contents part of the broadcasting program when the area name is included in the area designation part; and

AMENDMENT UNDER 37 C.F.R. § 1.111
USSN: 09/695,141

a reproduction section for receiving and reproducing the contents part of the broadcasting program outputted from said broadcasting propriety discrimination section.

7,

4

(original) A satellite broadcasting reception apparatus, comprising:

a radio wave reception section for receiving a broadcasting program in which an area designation part and a contents part are multiplexed;

A1 a current position acquisition section for detecting a current position of said reception apparatus;

an area to physical district coordination table including pairs of information each of which represents an area name and a physical district of the area name;

a current area detection section for searching for an area name which includes the current position detected by said current position acquisition section from within said area to physical district coordination table and outputting the searched out area name;

a broadcasting propriety discrimination section for comparing the area name outputted from said current area detection section and the area designation part of the broadcasting program received from said radio wave reception section with each other and refraining said broadcasting propriety discrimination section itself from outputting the contents part of the broadcasting program when the area name is included in the area designation part; and

a reproduction section for receiving and reproducing the contents part of the broadcasting program outputted from said broadcasting propriety discrimination section.

AMENDMENT UNDER 37 C.F.R. § 1.111
USSN: 09/695,141

~~2, 5~~ (new) The satellite broadcasting system of claim 1, wherein said transmission apparatus is a satellite transmission apparatus.

~~4, 6~~ (new) The satellite broadcasting system of claim ³~~2~~, wherein said transmission apparatus is a satellite transmission apparatus.

A1

~~6, 7~~ (new) The satellite broadcasting reception apparatus of claim ⁵~~3~~, wherein said radio wave reception section receives said broadcasting program from a satellite.

~~8, 8~~ (new) The satellite broadcasting reception apparatus of claim ⁷~~4~~, wherein said radio wave reception section receives said broadcasting program from a satellite.
